

CAPABILITY CHECK

MATERIAL COMPLIANCE

Strategic Material-Compliance Management

Are you familiar with the uneasy feeling of a reactive approach when it comes to Material Compliance inquiries from your clients, along with the cumbersome search for necessary material information? No wonder – with the rapid increase in product-related environmental regulations, complying with legal as well as customer-induced requirements related to Material Compliance poses a significant challenge for businesses. However, meeting material- and substance-specific requirements is fundamental for the marketability of your products and thus, for the long-term success of your company. It is time to gain a fresh perspective!

- ∞ What obligations are relevant to my company?
- ∞ What demands do our customers pose and must we meet every request?
- ∞ Are all necessary measures being taken?
- ∞ Is there a systematic and cost-effective approach?
- ∞ Is there room to harness synergies and potential for improvements?
- ∞ What is missing to meet legal and customer-specific requirements?

With our 'Material Compliance Capability Check,' you can finally bring order to the complex array of obligations and, step by step, determine, evaluate, and develop an individual approach to strategically implementing Material Compliance in your company together with our experts. Would you like to learn more in a completely non-binding manner?

Simply contact us for a 'Material Compliance Capability Check' at hello@novaloop.de or speak to us at +49 173 2090 790.

PROCESS EVALUATION

A thorough evaluation of existing processes is essential to identify potential gaps in your material compliance set-up and to optimize processes. We assist you in keeping track by examining your production and distribution processes in detail and by helping you to effectively utilize existing data.

OBLIGATION ASSESSMENT

Learn about the obligations and regulations relevant to your company. We support you in assessing your customers' requirements, ensuring compliance with their terms. A comprehensive analysis of your obligations will keep you informed about regulatory requirements, enabling you to adapt your set-up accordingly.

GAP ANALYSIS

Discover existing deficits and potential for optimizing your Material Compliance strategy. We assist you in identifying synergies, recognizing improvement opportunities, and minimizing risks.

STRATEGY WORKSHOP

In a workshop, you collaboratively develop a future-oriented strategy with us to achieve long-term success. We assist you in proactively preparing your company for potential risks and establishing a solid foundation for your Material Compliance strategy. Let's work together on strategically positioning Material Compliance within your company and building or further developing the necessary processes and standards.
